

INDUSTRY SOLUTION

# Maantic's Patient Lifecycle Management

Embrace a Patient Lifecycle Management solution to optimize patient care and streamline operations effortlessly, utilizing robust capabilities of Appian Business Process Management (BPM) platform.

## THE BUSINESS NEED

In the ever-evolving healthcare landscape, optimizing patient care and improving operational efficiency are paramount. Manual processes for patient registration, appointment scheduling, care coordination, and post-treatment follow-ups often result in errors, delays, and a disjointed patient experience. This solution aims to address these challenges by streamlining workflows, enhancing communication, and offering a unified approach to manage patient interactions across the entire healthcare ecosystem.

## OUR SOLUTION

Maantic's solution leverages the Appian BPM platform to design and implement a robust **Patient Lifecycle Management**. This solution incorporates automation, integration, and intelligence into key healthcare processes, ensuring a cohesive and patient-centric approach. Features such as Electronic Health Record Integration, Contact Centre Capability, Virtual Consultation, and Interactive Live Chatbots enhance the healthcare experience for both professionals and patients alike, fostering efficiency and seamless coordination.

## KEY BENEFITS

Enhanced patient engagement and satisfaction

Streamlined administrative processes

Improved accessibility to healthcare services

Personalized patient interactions

Secure management of patient records

Data-driven insights for continuous improvement

Reduced manual workload through automation

Advanced decision-making capabilities

Enhanced quality assurance and compliance tracking

Improved operational efficiency and cost-effectiveness

# KEY FEATURES
