

Accelerate and Improve Delivery with Architect Services

At Appian, our priority is to help you build powerful applications fast. Architect Services equips your team with Architects that have deep product expertise to accelerate development and ensure the quality of high-impact applications.

BENEFITS

- Increase development speed
- Overcome obstacles impeding your team
- Scale with confidence
- Create and improve modern and intuitive applications with expert UX advice
- Proactively identify risks
- Expand the skill set of your Appian developers

FEATURES

We focus on five fundamental areas to expand your team's capabilities and accelerate your success:

ARCHITECTURE PLANNING

Optimize Appian architecture to better align with your business strategy and vision

HOW TO?

Take advantage of Appian's newest features and emerging technologies such as Artificial Intelligence and Machine Learning

DEVOPS

Enable your team to move faster by automating testing and deployments

DEVELOPER SUPPORT

Accelerate your team's capabilities through solution design guidance, targeted application reviews, and on-demand troubleshooting

HEALTH MONITORING

Ensure applications are running smoothly with Health Check and performance tuning

ACCOUNT ARCHITECT

Architect Services customers have a dedicated primary contact who works with your team to understand your business and provides guidance on the best way to leverage the service.

PLANNING MEETINGS

As an Architect Services customer, you'll meet weekly with your Account Architect to ensure you're taking full advantage of the offering.

Visit the [Community site](#) to learn more. If you have questions, please contact your Account Executive.

Appian provides a low-code development platform that accelerates the creation of high-impact business applications. Many of the world's largest organizations use Appian applications to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.
