

# APPIAN ACCELERATOR FOR FAST RESULTS

**Bits In Glass**  
Your Business. Optimized.

The Clinical Trials Intake (CTI) application is a complete framework that coordinates the various intake, regulatory, legal and feasibility considerations of a clinical trial into a simple tracking system. Built from the ground up with a modular design, CTI is easily configurable and can be tailored to match any existing intake process with pre-built interactions for regulatory compliance, regulatory and operational checklists, legal negotiation, document management and has room to add more.

#### WHAT IS AN APPIAN ACCELERATOR?

An **Appian Accelerator** is an application that covers the core functionality for a particular business function. It provides Appian customers with a “running head start” so they can deliver applications in less time as compared to starting from scratch. Appian Accelerators lower risk, reduce implementation timelines, are compliant with Appian best practices and, most importantly, reduce time to value.

The best part is that customers can still overlay their specific business needs or “secret sauce” on top of an Appian Accelerator by working with our team of domain experts and Appian technical consultants.

# CLINICAL TRIAL INTAKE ACCELERATOR

Clinicians need to intake patients quickly into new trials and BIG's CTI application built on the Appian platform eliminates the need for spreadsheets, organizes the all of required onboarding tasks, and notifies key stakeholders automatically. The application enables multiple departments to collaborate on needed documents and receive important notifications instantly so staff can get to work on meeting the needed legal, financial or regulatory requirements.

## ACCELERATOR BENEFITS & FEATURES

### Key Benefits

Tailor any existing intake process with pre-built interactions for:

- ◆ Regulatory compliance
- ◆ Regulatory & operational checklists
- ◆ Legal negotiation
- ◆ Document management

### Key Features & Functionality

- ◆ Intake patients quickly with flexible and configurable dynamic case management.
- ◆ Collaborate and assign cross-departmental tasks using CTI's access portals for departmental specific tasks, including sending notifications to departments such as Legal, Financial and Regulatory.
- ◆ Easily find and control all of the intake documents using document management capabilities.
- ◆ Keep track of all user interactions and activity with configurable auditing and reporting.
- ◆ Highlight and anticipate potential upcoming resource constraints and bottlenecks with visual resource forecasting
