

CoE App

Effortlessly manage your
Appian projects, from start
to finish

One of the most common challenges faced by enterprises is managing multiple projects and applications simultaneously through a Center of Excellence (CoE). Organizations may use several tools to track project related details, resources, releases, and documentation, among others. Instead of juggling between different platforms, get started with a versatile, all-round CoE solution that perfectly meets the needs of your business.

Industry Challenges

12%

of resources are wasted by organizations due to ineffective project management

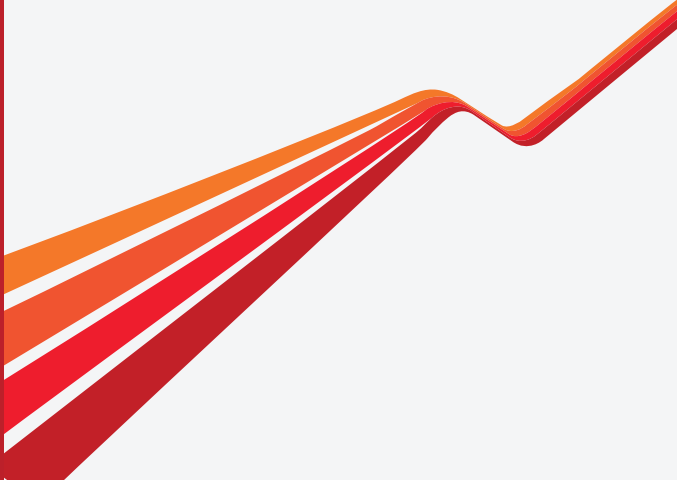

47%

of agile projects are late, have budget overruns, or result in unhappy customers

(Source: PMI, Scrum)

CoE App - Unlock the power of reusable functional components and drive operational excellence

Stay on top of your Appian projects. Track the progress, releases, plug-in versions, strategic items, and much more. Combine the power of low-code with our CoE component library to unlock even more gains in speed-to-market and cost reduction of delivery.

A decorative graphic consisting of several overlapping, wavy lines in shades of orange, red, and white, extending from the bottom left towards the bottom right of the page.

Key Features

Implementation of strategic items

Establish key performance assessment criteria, called strategic items, for every project

Gamified league table

Rate the performance of the applications and the teams against the strategic items every month

Component library

Store and access a collection of reusable functionalities, patterns, coding, and design elements in a visually-rich manner to develop new applications

Plug-in tracker

Manage plug-in adoption and version control across the applications and platforms

Automated upgrade planner

Track and display release activities and schedules to automatically generate milestone-driven upgrades

Knowledge sharing

Schedule knowledge-sharing sessions with the teams to adopt the best practices in a standard way

Intuitive dashboard

Track and pinpoint key focus areas for improvement in projects with regard to resource constraints, the scope for automated testing, training requirements, and license usage

Add queries

Users can raise queries within the CoE app, and the addressed queries could be documented for future reference

Meeting calendar

Schedule regular team cadence calls right from within the application to understand the progress of the projects and the challenges

Consolidated project view

Gain a 360-degree view of the status of every project and strategic item, the performance of the team members, documentation on architectural patterns and best practices, releases, and their checklist

Business Benefits

- ✓ Easily track project-related KPIs and everything about applications at one designated place
- ✓ Set and track timelines and strategic development plans to never miss a deadline
- ✓ Enhance collaboration between CoE teams and project teams efficiently
- ✓ Prevent clashes of upgrades and production release plans
- ✓ Develop applications faster with reusable component library
- ✓ Establish best practices for executing projects so that every team member is on the same page
- ✓ Gain insights into the license usage to not exceed the budgets
- ✓ Celebrate wins, encourage teams to help each other, and foster a healthy relationship through gamified features

Having a CoE app can be a huge benefit to organizations. Not only does it serve as a specialized expertise hub, but it also offers opportunities for internal growth and supports efficient project development.
