Personal Medical Advocate

Google Maps API

Need a dynamic map for a new location? Want directions now?

Instead of using Google, Appian makes it easier for you.

Bulk File Uploader

Having many files to upload? With one quick step and you can upload entire documents into Appian.

USPS Address Verification

Double check the provided address for receiving postage, with

one easy click.

Persistent System's Personal Medical Advocate (PMA) creates a 360° view into the patients' health. Cutting insurance costs through early risk detection.

This solution generates a dynamically engaged system that generates a 360° view into the patient's health record, risk assessment, and provides the HCP with the necessary transparency to identify health risks in their early stages. Early detection has been proven to reduce insurance costs, while also extended the lifespan of many patients.

Empowering Personal Medical Advocates with a 360° view of patient data, generating efficient health monitoring and risk tracking.

Fitbit

Monitor patient's health by their level of activity and heart-rate. This empowers the HCP to be proactive in early detection.

Active 911

An emergency has occurred, each incident will be recorded and then tracked in Appian. Generating patterns in order to monitor asset.

Risk Assessment

Our accelerator continuously monitors your data, resulting in automatic identification of risks, before they turn into issues.
