

Draftable Compare Document

Draftable Compare Document smart service :

- This smart service can be used to compare two different documents side by side.
- Can be used to compare the different versions of the same document.

Parameters :

Input -

- Account Id (Text)
 - Provide the Account Id available on the credential page.
<https://api.draftable.com/account/credentials>
- Auth Token (Text)
 - Provide the Auth Token available on the credential page.
<https://api.draftable.com/account/credentials>
- Left Doc ID (Document)
 - Provide the left document to compare.
- Left Doc Version (Integer)
 - Provide the Left Document version. For the latest version use -1.
- Right Doc ID (Document)
 - Provide the right document to compare.
- Right Doc Version (Integer)
 - Provide the Right Document version. For the latest version use -1.
- Is Public(Boolean)
 - Provide true if the comparison can be accessed by anyone with knowledge of the URL. Default true.
- Expires In Hour (Integer)
 - Provide the number of hours after which the comparison will be deleted. Provide 0 to avoid expiry.
- Self Hosted Url (Text)
 - Provide the self hosted URL of the draftable API eg:
'<https://draftable.example.com/api/v1>'

Output -

- Error Message (Text)
 - Provides the error message if any error occurred.
- Error (Boolean)
 - Returns true if any error has occurred.
- Identifier (Text)
 - The Identifier for the competition.
- Public Url (Text)
 - The Public URL for the competition.

- Signed Url (Text)
 - The Signed In URL for the competition.
