iHRMS

Intelligent Human Resource Management Suite

A Smart HR Suite to effectively orchestrate and automate people workflows, from hire to retire and everything in between.

THE BUSINESS NEED

Typical Core HR functions such as Recruitment, Onboarding, Time Management, e-separation, etc. get processed in a separate system, and are not integrated with those used for talent management and workforce optimization. This hampers ease of use, diminishes the user experience, and makes data more difficult to analyze for valuable insights.

All of these disparate solutions have been bundled into a one-stop HR Framework built on the Appian platform.
Establishments should be able to rely on their systems to guide them through continuing changes, but legacy on-premises systems are inflexible.

There is a need for a one common system that can provide with:

CUSTOMIZABLE WORKFLOWS

POWERFUL ANALYTICS & REPORTS

EFFECTIVE SLA MANAGEMENT

ROLE BASED ACCESS CONTROL

OMNI-CHANNEL CASE MANAGEMENT

INTEGRATION WITH EXISTING SOFTWARE SYSTEMS

KEY FEATURES

The Smart Human Resource Management Framework developed by Maantic is built on Appian Low-Code Platform allows companies to effectively orchestrate and automate people workflows, from onboarding to offboarding and everything in between.

ONBOARDING

PAYROLL INTEGRATION

ASSET MANAGEMENT

RECRUITMENT

SERVICE MANAGEMENT

TIMESHEET

... AND MORE!
