

Grants Manager

GxP Partners' Grants Manager automates internal and external grant application processing by leveraging built in business rules, AI, and configurable workflows/notifications while providing complete visibility into the application and fund accounting process.

Most grant management solutions are implemented in siloed, outdated, inefficient systems that cause disconnects between the source grant funding, sub-grant creation, application review/approval, and the fund allocation process. This affects not only the constituents who need their grant applications processed quickly, but also the agencies that oversee the compliance and enforcement of grant dollars.

These inefficiencies create data duplication, processing bottlenecks, disjointed user interfaces, and a lack of data transparency which are the major hindrances to the grant management mission causing process, audit, and user challenges.

Grants Manager Capabilities

Built on the Appian Low-Code Platform, Grants Manager provides a digitized, wizard-driven application process with complete visibility into applicant and application status. The solution is equipped with the following capabilities and features:

- **100% User Configurable:** multiple Departments/Agencies can be created and managed through the easy-to-use user interfaces.
- **508 Compliant Intuitive User Interfaces:** configurable role based dashboards and an easy-to-use fully integrated public portal reduces training requirements and provides an exceptional user experience.
- **Quicker Grant processing:** built-in configurable data validations reduce risks and accelerates applicant/application processing from weeks to days.
- **Clear audit trail:** track every step, action, determination, and data change in the system within an easy to understand and configurable audit report.
- **Seamless integrations:** quickly integrate to your internal legacy and cloud-based systems with out of the box no-code connected systems.
- **Automated workflow:** incorporating AI/ML and RPA enables knowledge workers to shift their focus to higher-value tasks.
- **Centralized data:** to view all Grant Application and Accounting data in one place.

Grants Simplified
Built on the Appian Low-Code Application Design Platform as a Service (PaaS), Grants Manager provides a fully configurable end-to-end Grant Lifecycle Management and Reporting solution that provides full fund accounting transparency from fund sourcing, through the sub-grant program creation, to applicant awards, and applicant reporting.

At GxP Partners, we are a team of experienced application designers who are dedicated to solving complex enterprise-level business problems using low-code application design technology. Founded in early 2000, our core mission is to enable Federal, State, and Local agencies to rapidly optimize, transform, and innovate modernization efforts through our proven agile application design and delivery methodologies. Our team of process automation experts will work closely with your IT and Business Stakeholders to quickly onboard and tailor our secure cloud solutions to your exact requirements.

Grants Manager Drives Real Business Impact

Grants Manager Solution Features	Business Impact
Online Application Filings	Fully integrated external portal with wizard-driven application process and milestone tracking.
Improve Constituent Experience	Real-time updates through configurable email and mobile notifications.
Modern Mobile Experience	Runs on all modern browsers and iOS/Android devices natively.
Complete Fund Accounting and Auditing	Track all Grant Funding flows from source, to sub-grant distribution, and applicant awards.
Complete Transparency	Configurable dashboards and ad-hoc reporting provides a real-time holistic picture of your entire Grant operations.
Built-in Document Management	Collect and link supporting documents to the Grant Application process. Automatically generate and distribute letters with integrated templates.
Improve Compliance	FedRamp, HIPAA, and SOC 1,2,3 Cloud Certifications. Complete internal audit trail for system configurations and grant record updates.
Flexible	Tailor the system to your exact requirements with configurable workflows and role based security.

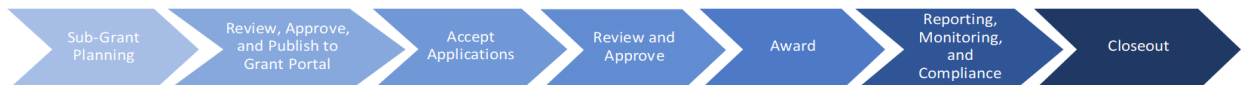

appian

Appian is the unified platform for change. Appian accelerates customers' businesses by discovering, designing, and automating their most important processes. The Appian Low-Code Platform combines the key capabilities needed to get work done faster, Process Mining + Workflow + Automation, in a unified low-code platform. Appian is open, enterprise-grade, and trusted by industry leaders. For more information visit appian.com.
