

SILVIA

Dynamic Case Management

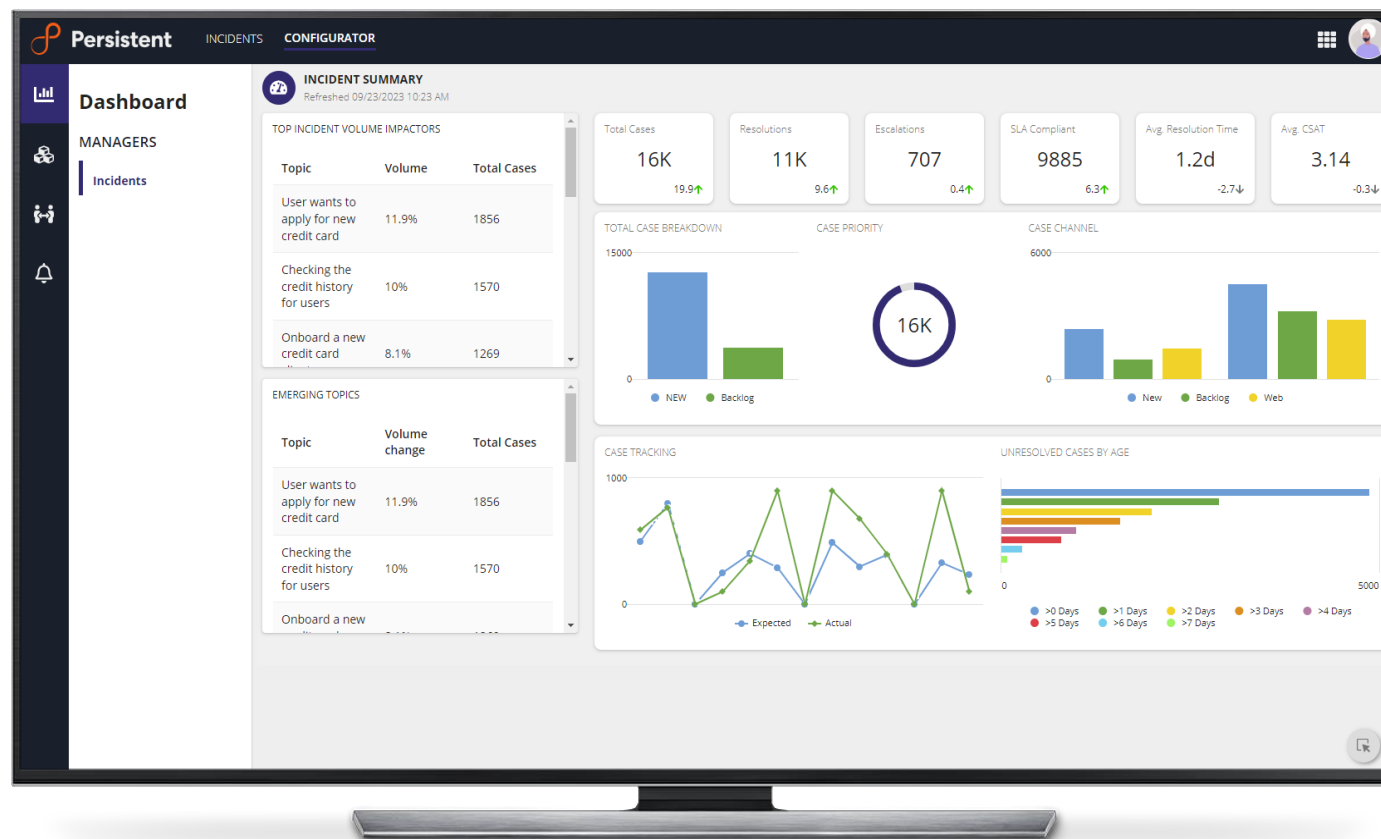

Dynamic Case Management - SILVIA

Overview

- Streamline your organizational and client cases using our adaptive case management solution – SILVIA
- SILVIA allows case workers to **manage cases** with **various complexities** and **personalized categories** without the need to involve engineering team

Features

- Truly No-Code, scalable and hyper-personalized case management solution
- System understands and offers the **next best task** to the case workers based on ticket details, SLA, user priority and status
- Maintains SLA transparency with the case workers
- Reduces training efforts** by building activity knowledge, checklist and links into the system, allowing case workers to easily switch between the case categories
- Workers can offload their mundane tasks to **robotic workforce**
- Unified user interface with plug-n-play solution

Why SILVIA

True No-Code with Appian

- \ Allow addition of dynamic workflows into the system with **no additional development**
- \ Create various levels of workflows with specific data points, knowledge and checklist

Intelligent Incident Assignment

- \ System understands and offers the next best task to the incident worker based on ticket details, SLA, user priority and status
- \ Maintains SLA transparency with the incident workers

Incident Knowledge

- \ Reduces training efforts by building activity knowledge, checklist and links into the system
- \ Incident workers need not go through training while switching between the teams

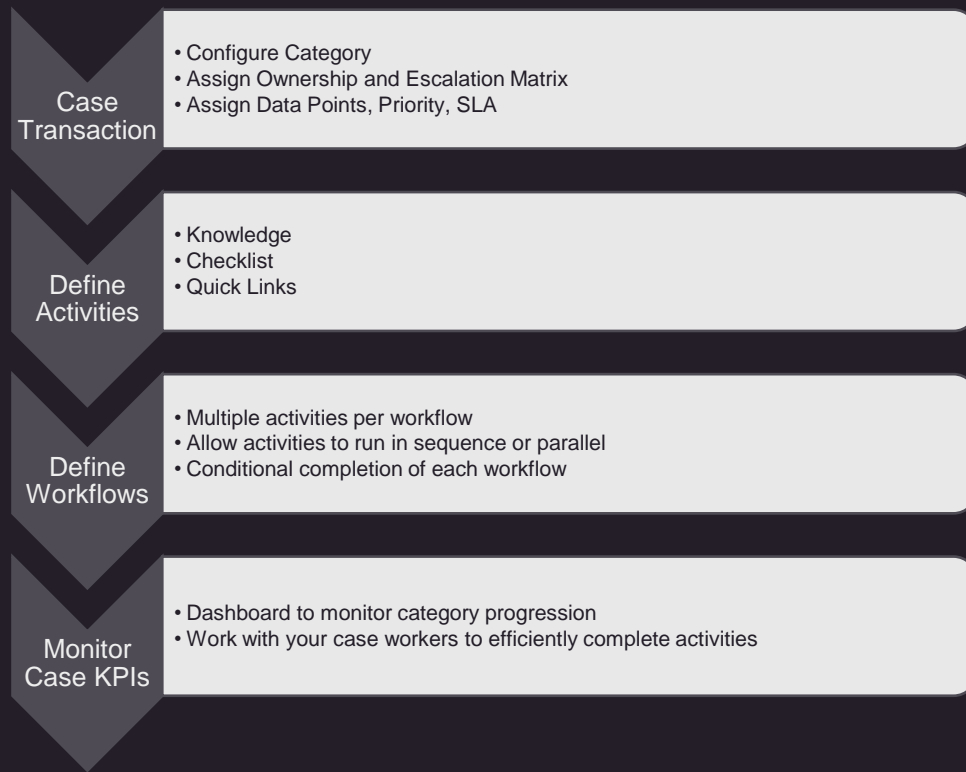

Combine Human and Robotic Incident Workers

- \ Incident workers can offload their mundane tasks to the robotic workforce
- \ Fire and forget the robotic processes as part of incident activities
