

PERSISTENT

Partners in Innovation

Pitchbook

Manage Presentation / Product

Maintaining and updating existing Presentations/products as well as creating new ones

Presentation Dashboard

Presentation dashboard shows recently created / updated presentations and drill down pie chart which shows presentations based on domicile selected

Product Dashboard

The Product dashboard shows the Product usage information, that is; it displays how frequently a product has been used in various presentations.

Manage Templates

Application has flexibility to change the template of the presentation and this is achieved by the manage template dashboard.

Manage Glossary

The Manage Glossary dashboard is implemented in an editable grid with pagination and it can update the existing entries or can create new ones.

User Activity

The User Activity dashboard can keep track of the number of presentations created by each user within the organization.

Persistent Systems' Pitchbook is a tool that can be used by sales representatives from various enterprises for effective and accurate sales pitch.

Based on the client's domicile and meeting criteria the products are classified as recommended products, recently updated products and a list of all products. As per the client's interest, the products shall be added to the deck of slides and finally the deck (in the form of powerpoint) can be shared with the client via email

Pitchbook empowers sales team to quickly and efficiently generate custom pitches for latest products using compliant templates for their clients
