

A Vaccine Validation Solution to standardize employee readiness

Ignyte's Vaccine Validation Solution helps employers mitigate the risk of COVID-19 for its workforce by efficiently and consistently implementing industry best-practices to verify vaccination status.

The Vaccine Validation Solution enables employers to efficiently manage and validate employee's COVID-19 vaccination records.

57%

Of employers either require or plan to require vaccinations...

...Impacting more than

84 M

employees

Leveraging Intelligent Document Processing and Robotic Process Automation, key details of a person's vaccination card are analyzed for common signs of forgery. This eliminates the potential for human error and provides a standardized process for making decisions.

With the mass return-to-work movement, triggered by the COVID-19 pandemic, tools to facilitate the verification of vaccination records are imperative for employers to ensure a safe and healthy workforce.

Key Functions & Features

Simplified Vaccine Collection

Provide employees with an intuitive mobile application to snap a photo of their COVID-19 vaccination card.

Automated Document Processing

Parse key information from an employee's vaccination record, including lot numbers and dates administered, automatically using Intelligent Document Processing.

Adaptable to Changing Guidelines

Quickly implement additional validation checks to stay up to date with changing public health guidelines and comply with industry best practices.

Gain Insight with Employee Reports

Gain a clear understanding of the state of your workforce to better view employee validation status.

Manage Comprehensive Auditing

Track and record the full validation lifecycle beginning with vaccination upload and progressing through completed validation to best control workforce readiness.
