Appian SiteConnect Accelerator for Clinical Trial Management

Clinical trials are expensive. With the constraints of quality and compliance, the only way to reduce costs is to make trial operations more efficient. Clinical operations personnel routinely face multiple challenges during a study, such as:

- Identifying appropriate physicians and facilities for sites
- Getting sites ready to begin enrolling subjects
- Processing site payments
- Investigating issues with site payments
- Tracking expired site documents
- Monitoring site performance and compliance
- Making sure sites address protocol deviations and action items

Our SiteConnect accelerator, built on Appian, can address these challenges by automating and optimizing workflows for maximum operational efficiency and outstanding customer experience. It provides study sponsors and contract research organizations (CROs) to securely exchange information, documents, queries, and supplies with their clinical sites. The result? Reduced confusion and errors, improved relationships with investigators and site personnel, and a drastic decrease in clinical trial overhead costs. Because of Appian's flexibility and ease of use, it can support the complete product development and commercialization lifecycle, including all touchpoints with external stakeholders, such as clinical site personnel.

APPIAN SITECONNECT FEATURES

Our fit-for-solution Appian SiteConnect helps you use strategy, technology, and design to reduce clinical trial costs while improving quality and compliance.

- Provides seamless integration with public-facing websites and internal business systems
- Is mobile enabled for iOS and Android devices
- Control access to data via field-level and user group-level security, and full audit capability
- Displays relevant read-only data from integrated systems
- Captures data updates from site personnel and enables the upload and transmission of documents
- Supports digital signature approvals; sends automatic notifications even on mobile devices
- Enables claims management with automation of site payment inquiries and investigations
- Provides dashboards and reports on key metrics

Our SiteConnect accelerator is listed on Appian's App Market and can be fully customized to meet your needs.

THE APPIAN ADVANTAGE

As the market leader in business process management (BPM) software, Appian delivers an enterprise application platform that unites users with their data, processes, and collaborations – in one environment, on any mobile device, through a modern social interface. On-premises and in the cloud, Appian is the fastest way to deliver innovative business applications. You can use Appian SiteConnect to build distinctive applications with little or no code through a drag-and-drop user interface.

The Appian platform unifies data from various systems to deliver an exceptional user experience that is available on all devices without any additional configuration. This enables standardized policies and procedures, 360° data visibility, and insights to drive decision making.

- Leading solution in Gartner's BPM magic quadrant
- Single, unified platform for all application needs
- Quick application development; no coding experience necessary
- Capable of being validated to comply with 21 CFR Part 11 and Annex 11
- Already adopted by several large-scale life sciences organizations, including the FDA

WHY PERFICIENT

We are a leader in the design and delivery of customized enterprise technology solutions and have developed a wide array of intellectual property assets. These applications, utilities, and products enable our clients to speed time to delivery and reduce total cost of ownership. Whether bundled with our services in support of a broader initiative or implemented individually as a point solution, our products help the world's leading enterprises innovate more efficiently.
