Sample Learning Schedule

One of the great benefits of online training is that it's self-paced! You can decide when you're ready to move forward -- within a course or from course-to-course. However, we find learning is more effective if you set goals. Goals help you to continue and complete learning.

In Appian, following a schedule that includes content completion goals will also help concepts stay fresh. If you spread out your learning too much, it may be more challenging to recall concepts and procedures you learned early on.

Below, we've created a sample training schedule. Your schedule may be different, but whether you follow along with ours or create your own -- clearly defining your learning goals will help you to succeed.

Theme • **Courses** • **Skills Practices**

Day 1
- Introduction to Key Concepts
- Appian Essentials
- Introduction to Applications
- Quick Apps
- Exercise 1

Day 2
- Application Building Blocks
- Users and Groups
- Manage Data with Custom Types
- Exercises 2-4

Day 3
- Application Building Blocks
- Expressions
- Exercise 5

Day 4
- Core Application Objects
- Build Forms and other Interfaces
- Interfaces Tutorial
- Exercise 6

Day 5
- Core Application Objects
- Building a Process
- Exercises 7 - 12

Day 6
- Core Application Objects
- Records
- Exercises 13 - 14

Day 7
- Core Application Objects
- Decisions
- Reports
- Sites
- Exercises 15-16

Day 8
- Core Application Objects
- News
- SAIL
- Exercises 17-18

Day 9
- Application Challenge!

Day 10
- Application Challenge!
