

it WORKS,

1. I test my interface, clicking the SUBMIT button and it actually creates a new RECOR with the current data

Clientform Num: 111

Clientform Cedula: 11

Clientform Nombre: TEST111xxx

Clientform Apellido: TEST111xxx

Clientform Perfil: TEST111xxx

Clientform Fecha1: 07/30/2022

Clientform Telefono: test222

Clientform Ciudad: TEST111xxx

Clientform Dateadded: Jul 6, 2022

Clientform Lastmodifieddate: null

LOCAL VARIABLES:

Name	Value
clientformNum	111
clientformCedula	11
clientformNombre	TEST111xxx
clientformApellido	TEST111xxx
clientformPerfil	TEST111xxx
clientformFecha1	7/30/2022
clientformEmail	TEST111xxx
clientformTelefono	test222
clientformCiudad	TEST111xxx
clientformFile1	null
clientformAddedby	null
clientformDateadded	null
clientformLastmodified...	null
clientformLastmodified...	null
CaErrorMessage	null

2. This data now can be seen in the cloud database. Thank you very much for your help

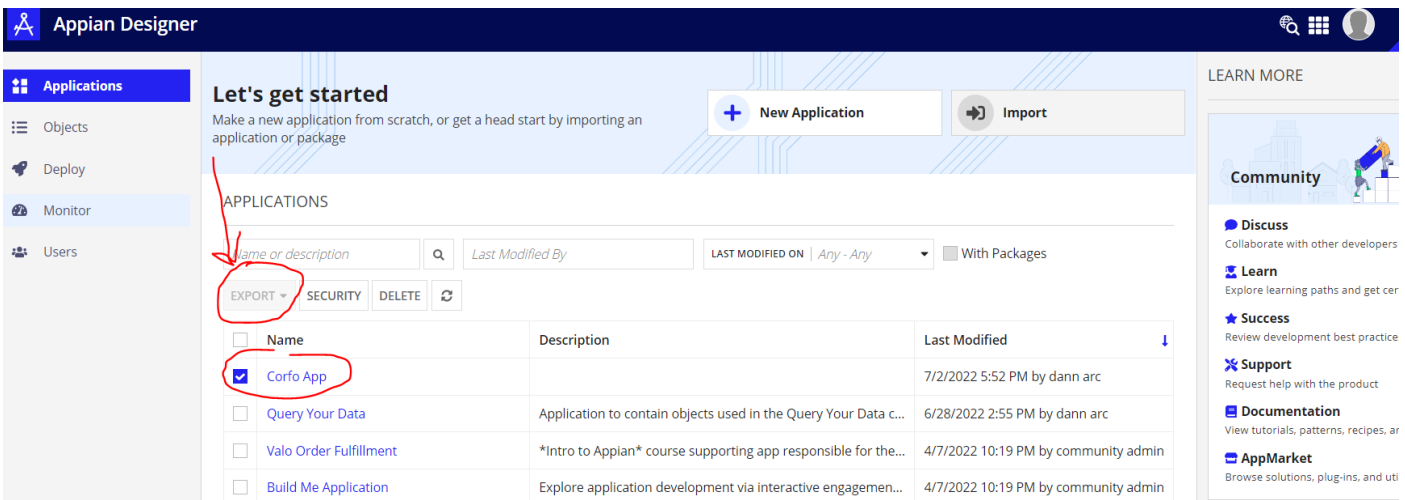

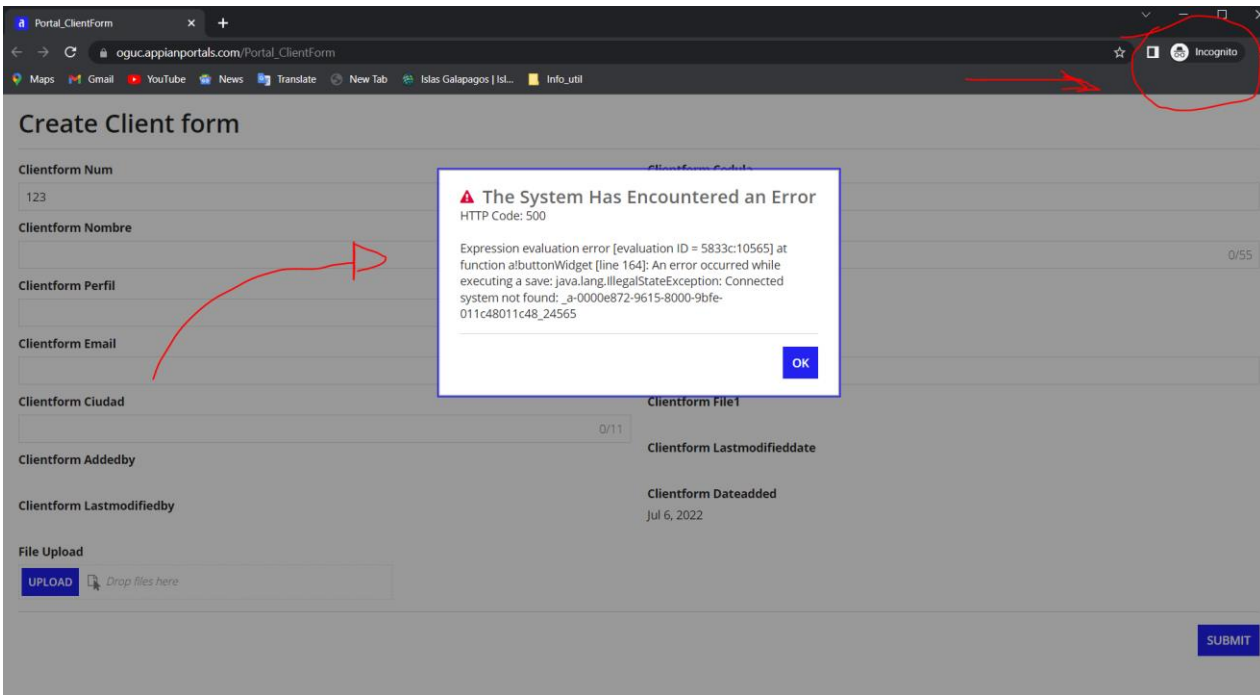

Showing rows 0 - 11 (12 total. Query took 0.0010 seconds)

but problems with publishing a portal

- I opened the portal created in an incognito tab to verify that anyone can complete the form, it worked correctly.
BUT, when I click the submit button to submit data, I get an error.

4. I think there is an error in the **INTERFACE** when I call the **INTEGRATION** in the **SUBMIT** button

This is my interface

The screenshot shows the Appian interface designer in Expression Mode. The left pane displays the code for the interface definition, and the right pane shows a preview of the form. A red circle highlights the 'SUBMIT' button in the preview, and another red circle highlights the 'rule!CA_ClientForm_Integration' call in the code. A red arrow points from the button to the code call.
